WORK EXPERIENCE

AI/ML Researcher, Memorial University of Newfoundland

Sep 2022 - Sep 2024

- Explored the possibility of controlling a wheelchair through "singing imagination" by designing a Brain-Computer
 Interface (BCI) experiment to collect Electroencephalography (EEG) time-series datasets from 15 participants
- Achieved 85% accuracy in classifying EEG signals using various deep learning and machine learning models (CNNs, RNNs, SVM, XGBoost), and provided insights into model performance through statistical analysis
- Enhanced the data quality and labeling system by building a data preprocessing pipeline using MATLAB & Python
- Boosted the classification accuracy by 8% using efficient feature extraction & optimization methods (CSP, mRMR)
- Improved the data analysis speed by 50% via building an automated pipeline on Compute Canada Cloud (<u>Code</u>)

SKILLS: Python, R, NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Matplotlib, Seaborn, EDA, Cloud (AWS)

Software Developer, <u>Toranj Innovation Technologies</u>

May 2021 – Jun 2022

A health tech company concentrated on creating software solutions for the healthcare industry.

- Increased the customer base by 20 % by expanding system scalability through developing secure Java microservices
- Doubled the speed of User Acceptance Testing process by implementing RESTful APIs integrated with <u>FitNesse</u>
- Eliminated the need for direct SQL queries by utilizing Object-Relational Mapping (ORM) systems like JPA
- Contributed to software development in a CI/CD environment by utilizing Git for version control

SKILLS: Java, Spring Boot, JPA, SQL, PostgreSQL, ETL, Git, Microservice Architecture, MVC Pattern

Software Developer, *Hoom Co.*

Apr 2020 – Mar 2021

A smart home technology company focused on developing IoT solutions for home automation.

- Enhanced the smart home functionality, and drove a 60% increase in sales by collaborating with cross-functional teams to develop an IoT Hub similar to Amazon Alexa using C and C++
- Boosted the communication speed between the Hub and smart devices by 25% by replacing HTTP with MQTT
- Delivered incremental software releases as part of a Scrum team, aligning with Agile best practices

SKILLS: C, C++, Bash, Linux, Git

PROJECTS

- Web Scraper: Reduced the manual data entry time by 75% by developing a Python-based web scraping script with Selenium library to automate TAs' tasks, such as grade entry, on the Memorial University web platform
- Fundamental Image Filters: Guided beginners in understanding fundamental image filters by providing detailed documentation on how the filters work and how to build them from scratch using Python & OpenCV

EDUCATION

Master's Degree - Computer Engineering, Memorial University of Newfoundland

Sep 2022 – Sep 2024

Bachelor's Degree - Electrical Engineering, Iran University of Science and Technology Sep 2017 - May 2022

CERTIFICATIONS & SKILLS

- Certifications: AWS Certified Cloud Practitioner, Coursera Machine Learning Specialization
- **Programming Languages**: Python, Java, C, C++, MATLAB, SQL, R
- Industry Skills: Data Science, Data Visualization, Statistics, Machine Learning, Deep Learning, Big Data (Hadoop, Spark), Object-Oriented Programming (OOP), AWS (EC2, S3, Lambda)
