WORK EXPERIENCE

AI/ML Researcher, *Memorial University of Newfoundland*, *St. John's, Canada*   **Sep 2022 – Sep 2024**

- Explored the possibility of controlling a wheelchair through "singing imagination" by designing a Brain-Computer Interface (BCI) experiment to collect Electroencephalography (EEG) time-series datasets from 15 participants
- Achieved 90% accuracy in classifying EEG signals using various deep learning (CNNs, RNNs) and classic machine learning (SVM, XGBoost) models and provided insights into model performance through statistical analysis
- Enhanced data quality and the labeling system by building a data preprocessing pipeline using MATLAB & Python
- Boosted classification accuracy by 8% using efficient feature extraction & optimization methods (CSP, mRMR)
- Improved data analysis speed by 50% via building an automated pipeline on Compute Canada Cloud (Code)

SKILLS: *Python, R, NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Matplotlib, Seaborn, EDA, AWS*

Software Developer, *Toranj Innovation Technologies*, *Tehran, Iran*   **May 2021 – Jun 2022**

A health tech company concentrated on creating software solutions for the healthcare industry.

- Increased the customer base by 20 % by expanding system scalability through developing fault-tolerant Java microservices
- Doubled the speed of User Acceptance Testing process by implementing RESTful APIs integrated with FitNesse server
- Eliminated the need for direct SQL queries by utilizing Object-Relational Mapping (ORM) systems like JPA
- Contributed to software development in a CI/CD environment by utilizing Git for version control

SKILLS: *Java, Spring Boot, JPA, SQL, PostgreSQL, ETL, Docker, Git, Microservice Architecture, MVC Pattern*

Software Developer, *Hoom Co*, *Tehran, Iran*   **Apr 2020 – Mar 2021**

A smart home technology company focused on developing IoT solutions for home automation.

- Enhanced smart home functionality and drove a 60% increase in sales by collaborating with cross-functional teams to develop an IoT Hub similar to Amazon Alexa using C and C++
- Boosted communication speed between the Hub and smart devices by 25% by replacing HTTP with MQTT
- Delivered incremental software releases as part of a Scrum team, aligning with Agile best practices

SKILLS: *C, C++, Bash, Linux, Git,* Object-Oriented Programming (OOP)

PROJECTS

Web Scraper: A Python-based scraper that automates manual grade entry tasks for Memorial University.   **Jan 2023**

- Reduced the manual data entry time by 75% by developing a Python-based web scraping script with Selenium library to automate TAs' tasks, such as grade entry, on the Memorial University web platform

Mini-Online-Shop: A Java-based online shop similar to eBay, allowing customers to sell their products.   **Sep 2021**

- Enhanced the scalability of a mini-online shop by upgrading from monolithic to microservice architecture, enabling it to serve 1,000 customers using Java, Spring Boot, JPA, JWT, and MySQL

EDUCATION

- **Master's Degree - Computer Engineering,** *Memorial University of Newfoundland*   **Sep 2022 – Sep 2024**
- **Bachelor's Degree - Electrical Engineering,** *Iran University of Science and Technology*   **Sep 2017 – May 2022**

CERTIFICATIONS & SKILLS

- **Certifications:** AWS Certified Cloud Practitioner, Coursera Machine Learning Specialization
- **Programming Languages**: Python, Java, C, C++, MATLAB, SQL, R
- **Industry Skills**: Data Science, Data Visualization, Data Analytics, Statistics, Machine Learning, Deep Learning, Big Data (Hadoop, Spark), Computer Vision, Databases (Relational, Non-Relational), Cloud Computing (AWS, Azure)
